

Scenario Cards

<p>Your design budget has been reduced so you can no longer afford to use straws or paperclips in the design. Remove these items and find substitute materials.</p>	<p>There is a safety recall being implemented on the foam provided. You must replace the foam with another material.</p>	<p>The government has stated it wants the device you build to carry double the weight. You must carry twice as much weight across the crevasse. Modify and test your design accordingly.</p>
<p>There is a need for a scaled model of your design. Modify the model to half its original size</p>	<p>The price of wood has increased, making it impractical to use it in your model. Remove any materials made of wood and replace them with other materials</p>	<p>Modify your design so that people can slide across the crevasse rather than walk.</p>
