

# MAKER JOURNAL

Name: \_\_\_\_\_

Date: \_\_\_\_\_

All grades: Build a Maker Tote

Design Challenge: Final Design

## Our Final Tote Design!

Use the space below to draw a picture of the final design your team decided is the best for a Makerspace tote. Explain each change your team made that lead to the final design:

Example: In the first design we found that 3 binder clips weren't enough to attach 6 cups. In the 2<sup>nd</sup> design 4 binder clips weren't enough to attach 6 cups and the string wasn't strong enough to carry the contents! Our final design used 6 binder clips to connect 6 cups, and with the yarn our design held the content weight and passed all requirements! It was a great success!
